

LSG SERIES® LOAD SUPPORT GRID

"Saves money and lasts a lifetime!"

LSG SERIES® STABILIZER GRID provides superior support to your pavement system. The system confines materials and prevents lateral movement away from the applied load. The stabilizer grid acts as a large mat, by spreading the load over an extended area while increasing the load bearing capacity of the pavement surface.

APPLICATIONS INCLUDE:

Gravel | Grassy Paving

- Driveways
- Municipal and private roads
- Access roads
- Parking lots | Parking pads
- Fire access lanes
- Overflow parking

Pavers

- Pathways
- Patios
- Driveways

Gravel-Lok® (Bonded Gravel)

Mud Management (farms, horse paddocks)

Green Roofs

**Reduce Stormwater Runoff • Reduce Base Thickness • Reduce Subgrade Stress
Reduce Installation Costs • Reduce Maintenance • Increase Strength
Increase Load Support • Increase Pavement Life • Increase Performance**

LSG SERIES® LOAD SUPPORT GRID

GRAVEL

Permeable gravel pavements are permanently stabilized with the LSG series®. Eliminate rutting.

GRASS

Permeable grassy paving is ideal for overflow parking, parking pads, and heavy vehicle access.

*Aggregates and soil are mixed for load support and root growth. Ratio varies. Call for details.

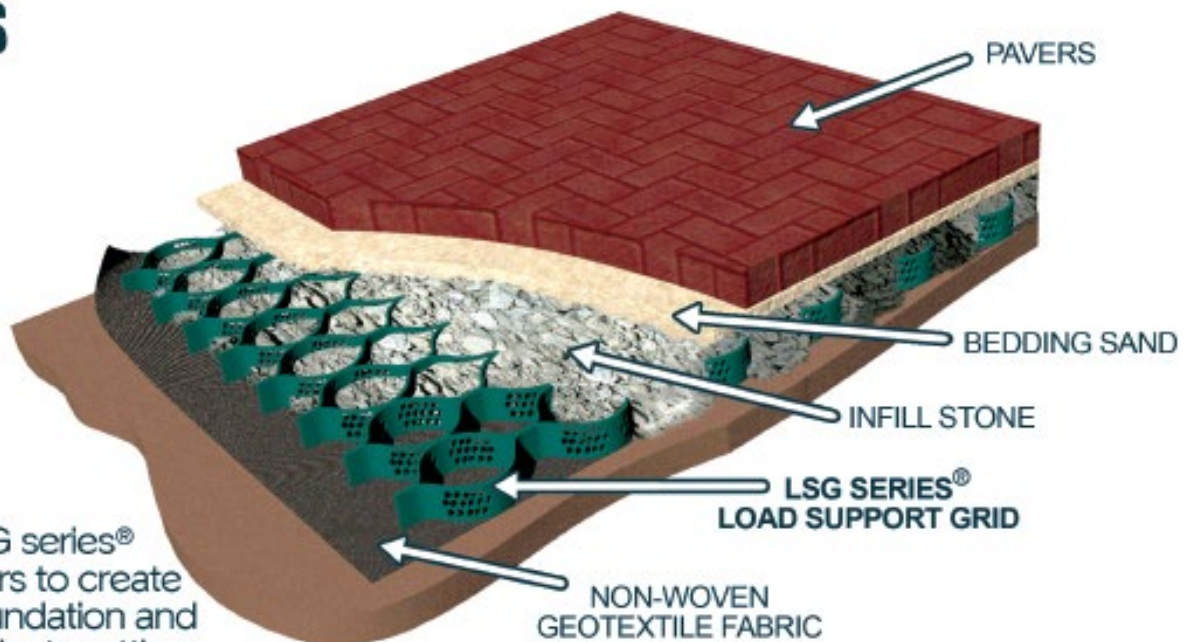

"Makes a great foundation for any surface!"

Gravel-Lok POROUS STONE PAVING

Combine natural pebbles with our polyurethane binder, Gravel-Lok®. The mixed formula is troweled in place and creates a durable, decorative, eco-friendly porous surface.

PAVERS

Use the LSG series® below pavers to create a strong foundation and virtually eliminate rutting.

Also ideal for stabilizing the top layer of gravel in a permeable paver application.

TYPICAL INSTALLATION of LSG SERIES® as base foundation for Gravel-Lok® or pavers.
 For non-bonded gravel or grassy paving, see website for installation - www.celltekdirect.com
